Login to post You can resolder the joint, replace the relay or replace the control. Control board part number is 00266746.Go to These guys offer every solution imaginable for refacing your existing dishwashers. They make dishwasher covers in a variety of designs, textures, solid colors and stainless. Check out their website and if you still have questions get in touch with these guys. They are able to walk you through all the available options and keep you from having to replace the entire door. I no longer have manual Under the unit is a white plastic tray. If that is filled with too much water the float will not let water in. As a temporary solution I found if I soak up the water with a towel it will then let water in. I dont however know why I keep getting so much water in the tray. I posted a question about it but have not solved it yet. There is a common circuit board issue where a cold solder joint on the heater relay pops. The water does not heat sufficient to evaporate any longer. Consult your manual for self diagnosing trouble shooting codes or go to appliance aid.com. If the board connection is the issue I have repaired several, however Bosch recommends replacement only and sometimes supplies the parts free. <http://www.szeplak.hu/images/upload/compaq-presario-m2105us-manual.xml>

Check your model under then call 800.856.9226 to setup a recall repair appointment. We just found out about this recall and was never notified by Bosch even though we registered our unit after we purchased it. talk about poor customer service. Hope this helps! Left then keeps running and notstopping Answer questions, earn points and help others. Once there, you will be given The site maintains the reference Use of this Web site constitutes acceptance of the Terms of Service and Privacy Policy. Please refer to product details and specifications when making a final selection for purchase. Really clean. Bosch dishwashers are engineered to perform at the highest levels, to spotlessly remove even the toughest soiling. Think baked in spinach. At the same time, smart technologies ensure that Bosch power is directed in a way that smartly manages energy and water consumption, and protects delicate items, preserving their brilliant shine wash after wash, year after year. Bosch dishwashers are the quietest. When in action, its noise factor, or rather the lack of it, thatll draw your attention. Our dishwashers are the strong, silent type. They outperform your expectations and the competition constantly earning top rankings from leading consumer publications and test labs worldwide. With a suspended twopump motor system, vibrations and noise are drastically reduced. Actual delivery times will vary based on your location. If you are ordering multiple items and not all items qualify for Quick Ship, the order will ship when all items are available to ship. Quick Ship may not apply to multiple quantities of the same product. Learn about our response to Covid19 Your appliance may differ depending on the manufacturer and model. Your appliance may differ depending on the manufacturer and model. Consumers should check with recalling firms for further details. Consumers should stop using recalled products immediately

unless otherwise

instructed. <http://www.vds-construct.pl/userfiles/compaq-presario-m2000-specifications-manual.xml>

It is illegal to resell or attempt to resell a recalled consumer product. No injuries have been reported. The brand name is printed on the dishwashers front control panel. Model and serial numbers are located inside the dishwasher door panel on the upper right side. CPSC's work to ensure the safety of consumer products has contributed to a decline in the rate of deaths and injuries associated with consumer products over the past 40 years. Please call Member Services at 18003330663 The recall is an expansion of a twoyearold recall that included 194,000 Bosch, Thermador, Gaggenau, and JennAir dishwashers for a total of 663,000 models in the U.S. and Canada. Over the past two years, BSH Home Appliances, which announced the recall with the Consumer Product Safety Commission, has received five reports of the power cords overheating and causing fires that resulted in property damage. BSH said that the overheating occurred when the dishwashers were in use, not when they were sitting idle. The repair should take less than an hour. You can also call the BSH recall hotline at 8889655813 or go to the website of the brand you own for more information. They are These identifiers are printed inside the dishwasher either on the top of the inner door panel or on the side of the panel. Bosch advises owners to pay special attention to the serial number because not every unit from the same model line is included in the recall.

If you enter your information on one of the websites, you'll quickly find out whether your machine is included in the recall. Consumer Reports has tested some of the recalled models but did not encounter problems with overheating power cords. We've flagged the affected models in the dishwasher ratings on our website. But the real thing is so much better. Follow me on Twitter. If your dishwasher model was released annually to the same hype as most mobile phones are every year, the release date would be ingrained in your memory even if youre not a fan of that particular model and never planned to get one. It is also handy to know the year for insurance purposes. This information will come in handy if you need to buy any spare parts or, again, if your dishwasher develops a fault and needs to be serviced. Inside the door or on the side panel of your dishwasher, you will find strings of numbers and letters hopefully still legible after years of use. One of these numbers is beginning with the letters FD. This is the serial number youre looking for. Ignore all these number but the first four. The last two digits represent the month. The production month is February. In that case, ignore the first digit, giving you the year 02 2002 and the month 05 May. She writes about education, parenting and linguistic technology.
