Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. A quarterly fee is payable. This doesn't take long and is easy to do. Just follow the simple instructions on the next few pages. The strength of the signal depends on where you site the base. Putting it as high as possible ensures the best signal. Use the power supply with the clear plastic end. The message counter comes on and alternates When there is no clear line of sight between the base and handset, e.g. base indoors and handset either indoors or outdoors, the range could be reduced to 50 metres. Thick stone walls can severely affect the range. When you are out of range, it flashes and BASE 1 is displayed. <http://parassteel.com/userfiles/dbl-2000-fireplace-manual.xml>

Then slide When the handset is If the symbol flashes and you hear a warning beep, you are out of range and will need to move closer to The main menu announcements are automatically made via the handset when Enter the correct setting within 15 seconds or the handset will return to standby. If the day and time are entered incorrectly 3 times the handset will return to standby. Use the power supply with the red plastic end. Open Calls list, page 32. Flashes when the handset is in use. Each menu has a list of options, which you can see on the menu map on the following page. You can correct any mistakes before you actually make the call. See page 32 for more information. It also enables other people in the room to listen to your conversation over the loudspeaker. The most recent number will be shown first. Your caller cannot hear you now. Names can be up to 8 characters long and numbers up to 20 digits. Press three times for 1. Press again. Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. Alternative arrangements should be made for access to emergency services. You can then choose to take the call or not. Also operates the answer machine functions. You can expect your Freestyle 1050 to provide many years of quality service. Please read the instructions carefully before use and keep this user guide for future reference. When you unpack you should have If no battery is installed, the BATT LOW light comes on when the mains power is switched on. However, leaving the handset on the base unit all the time can deteriorate rechargeable batteries. To get the longest possible life from your batteries, take the handset off the base for a few hours each day. An upstairs room is ideal. The following points should be considered. A newstyle telephone socket is needed for this product. If you do not have one, call us on Free fone 0800 800 150.

If you start to go out of range while using the phone, you will hear warning beeps. If you do not come back in range, your call will be cut off. The handset IN USE light comes on. The base unit light flashes. Listen for dial tone. You hear the dialling tone. The last number you called is redialled. However, if you hear noise or interference during your call You can then dial each number by pressing just two buttons. BT Selector. July 2008.
